

Friends of Cloudland Canyon State Park
Monthly Meeting
Thursday, March 27, 2026 - Group Shelter

The meeting was called to order at 6:00 p.m. by Dena Abell. She welcomed first-time attendees.

General Meeting

Before the meeting a variety of refreshments and drinks were available to enjoy while socializing with others.

Dena introduced our guests and welcomed them with an invitation to return next month. She said there are volunteer opportunities and encouraged their participation. She then provided time for each Team Lead to present their report.

The speaker was Larry Williams, and he presented a slide presentation with his comments on the various plants that are in our area. He was careful to note that some are poison to animals and / or humans. If you don't know for sure what you are looking at do not ingest or touch. Many plants look very similar and require expert knowledge to distinguish what plant is before you.

He said the desire is to only leave footprints (on the trail) and take only pictures. Taking portions of plants is likely an illegal act.

The meeting was adjourned at 7:00 p.m.

Minutes submitted by Harry Abell.
